Residential Commercial Services

Davey's Residential/Commercial (R/C) Services provide professional tree and shrub care to residential, commercial, government, and institutional clients. There are R/C offices in 47 states across the US., with teams of professionally trained ISA Certified Arborists whose primary purpose is to protect and serve the urban landscape and enhance our valuable greenspace. Davey's ISA Certified Arborists have taken the opportunity to further their education to apply their advanced skills to every client interaction. R/C provides services such as tree preservation, risk assessment, maintenance, planting and removal of trees, landscape care, and other grounds management services for clients.

In a sense, we are tree doctors who still make house calls. As preventive care is the key to good health, proactive monitoring is to tree, shrub, and lawn care.

Utility Services

The depth of resources and responsible approach to utility services have made Davey Utility Solutions the dependable choice, as Davey has provided utility line clearance services for over 100 years. Davey's Utility clients include Investor-Owned Utilities, Electric Cooperatives, and Municipal Owned Utilities. Davey's utility line clearance programs are carefully executed and monitored to obtain the right results, with minimum risk to the environment. This approach adds value and allows Utility customers to operate more cost-effectively.

Davey experts provide the maintenance of right-of-way corridors by manual, mechanical, and/or herbicide management methods. Additionally, we have 24-hour emergency restoration services to organize and dispatch professionally trained crews throughout North America.

Services include:

- Distribution right-of-way clearance
- Transmission right-of-way clearance
- Custom herbicide applications
- Right-of-way mowing

The Davey Utility Services are divided into two main operating groups. **Eastern Utility Services** (including **Wolf Tree, Inc.**) provides utility services to clients East of the Mississippi. **Davey Surgery Company** provides utility services to clients West of the Mississippi.

Davey Resource Group, Inc.

Davey Resource Group, Inc. (DRG) is the consulting and technical services subsidiary of The Davey Tree Expert Company. DRG has been providing right-of-way vegetation management and asset management services to the utility industry, as well as environmental consultation, since 1992.

DRG promotes a client-centered culture by incorporating the principles of quality, teamwork and communication (QTC). They have developed a systematic project management process that is safe, efficient and accurate. Their approach consistently produces superior results that are delivered on time and on budget. DRG specializes in utilizing cutting-edge technology to deliver superior results in the shortest time possible.

Utility Vegetation Management Services

DRG's UVM team provides integrated solutions to improve the right of way, vegetation, and land management programs of utilities and energy companies.

We successfully partner with clients to improve safety, compliance, reliability, productivity, customer satisfaction, and environmental stewardship. We pride ourselves on a client-centered approach and develop innovative, customized services for each client that deliver results, build trust and inspire confidence.

DRG UVM leverages technology and nationwide expertise to effect change with a purpose. We apply technologies like sUAV's, remote sensing, machine learning processes, and customized computer field data collection to create value and efficiency. Our diverse consulting team brings a wide range of perspectives including environmental science, utility design and construction, training and education, technology, and business expertise to support our client's business model.

Included in Utility Vegetation Management Services is the subsidiary **DRG Pacific Services, LLC** operating in the state of California.

Davey Mitigation

Davey Mitigation partners with clients to find solutions that fit their specific mitigation challenges. From landowners interested in stream or wetland easements on their property to land developers with projects that impact protected water resources during construction, Davey leverages their network of mitigation bank partnerships to find clients comprehensive solutions. Our team of experts can help clients find mitigation banking credits, establish mitigation banks, complete permittee responsible mitigation projects, develop water quality offsets, and more through our comprehensive custom mitigation solutions.

Bank Credits: Along with Davey Mitigations owned banks, the team can also help developers purchase their credits at the best cost and successfully navigate the permitting process.

Landowner Partnerships: From evaluation and project design to long-term management, Davey Mitigation works with landowners to protect the valuable natural resources on their land while enabling connections to multiple potential revenue streams.

Custom Mitigation Solutions: Davey Mitigation has extensive experience with all aspects of mitigation, including permittee responsible mitigation projects, turnkey mitigation, full-delivery mitigation solutions, and more. We are committed to creating high-quality, long-lasting projects customized to client specific needs.

Utility Asset Management Services

DRG's UAM team is committed to giving clients customized, cost-effective, and reliable asset management solutions. With decades of service to the utility and communications industries, their focus is on accurately and efficiently collecting data that can be utilized to help our clients make decisions about their assets. DRG's professionals have developed cutting-edge technology, refined data collection and verification processes, and process management tools that help our clients solve challenges. Utility Asset Management fields of expertise include Make Ready Engineering services, GIS field inventories of electric utility systems, pole loading and facility inspections, two pole remediation, joint use audits, National Electric Safety Code (NESC) inspections, transformer and equipment inspections, Automated Meter Reader (AMR) installations, facility Inspections, GIS consulting and mapping, streetlight audits, storm response, and communications construction & maintenance. UAM's focus is on solving clients' challenges while building long-term sustainable relationships with our utility and communications clients.

DRG's UAM team also provides full-service construction solutions to the communications industry. Our specialized team of experts blends a technical understanding of communications construction with industry knowledge and relationships that reduce the time it takes to get fiber on the pole and in the ground. Our focus on safety and reputation with pole owners and Investor Owned Utilities (IOU's) provide a single solution for One Touch Make Ready. Our client solutions include fiber deployment, new line construction, infrastructure enhancements, small cell/5G deployment, and maintenance services.

Current projects throughout the United States include:

- Make Ready Design and Engineering
- Overhead and Underground Fiber Construction Services
- One Touch Make Ready
- Doublewood Removal
- Ongoing Cable Maintenance and Repair

DRG AM is dedicated to delivering telecommunication construction services safely. They view safety and skills training as a continuous development tool, and all employees receive ongoing education related to electrical hazard awareness, observable hazard identification, defensive driving preparedness, and National Safety Electric Code training.
